Innovative and results-driven Frontend Developer with a passion for building efficient and scalable web applications. Skilled in utilizing modern technologies to create seamless user experiences, with a focus on front-end and back-end development. Adept at delivering high-quality solutions that meet client needs while optimizing performance.

SKILLS:

- **Expertise:** HTML5, CSS3, Tailwind CSS, React.js, React Router, Firebase.
- **Comfortable:** JavaScript, Next.js, Stripe, SSLCommerez, MongoDB, Express.js, JWT Token, AOS, Email.js.
- **Familiar:** Typescript, Mongoose, Ci/ Cd Pipeline, Node.js, Rechart, Map.
- **Tools:** Postman, Git, Surge, Netlify, Vercel, VS Code, Figma, Canva, Adobe Premier Pro.
- **Interpersonal Skills:** Problem-solving, Communication, Time management.

PROJECTS:

1. Elite Explore   **Live Site** || **Code**

A tourism management system with role-based dashboards, bookings, secure payments, real-time updates, and features.

Features:

- Implement multiple user roles (Tourist, Tour Guide, Admin) with role-specific dashboards and permissions.
- Allow users to book tours, make payments, and manage bookings, including status updates and payment transactions.
- Display random packages and tour guides, enable CRUD operations for users' stories, and provide a responsive, interactive UI with notifications.

Technologies: Tailwind CSS, React.js, Firebase, React Router, Node.js, Express.js, MongoDB, JWT, Stripe

2. Roomify   **Live Site** || **Code**

A hotel booking platform with interactive maps, secure authentication, booking management, user reviews, and payment.

Features:

- A modern homepage with an interactive map, featured rooms, and user reviews.
- User authentication with email/password, Google, or GitHub login and secure booking features.
- Dedicated pages for rooms, bookings, and reviews, with access control and a fun 404 page.

Technologies: Tailwind, React.js, Firebase, React Router, MongoDB, SSLCommerz, Node.js, JWT, Express.js.

3. NextBuy   **Live Site** || **Code**

Ai-driven E-Commerce Platform (Team Project)

Features:

- Modern e-commerce platform featuring Ai recommended products, sale countdowns, product categorization, blog integration, customer testimonials, and brand showcases for an enhanced shopping experience.
- Implemented a dynamic, role-based dashboard system for Users, Sellers, and Admins with tailored access controls and functionality based on user roles.
- As a **Team Leader**, overseeing project planning, task delegation, and team coordination throughout the development lifecycle.
- Designed the website architecture, Ai recommended products, implemented the full dashboard system, and integrated Stripe for secure payments.

Technologies: Next Js, Mongoose, Typescript, Redux, Gemini
